I undertake independent assessments in a variety of areas and write reports for the courts relating to males and females involved in family, criminal and civil proceedings. I also provide treatment to adults with a range of psychological difficulties.

Qualifications

- BSc(Hons) Psychology, University of Lancaster, 2009
- ClinPsyD (Doctorate in Clinical Psychology), University of Lancaster, 2016

Previous Experience

- 2016 – Present Expert Psychology Consultancy Ltd
Consultant Clinical Psychologist
- 2016 – Present Guild Lodge Secure Services
Lancashire Care NHS Foundation Trust
- 2013 – 2016 Clinical Psychology Doctorate
Lancashire Care NHS Foundation Trust
- 2010– 2013 Forensic inpatient Services
Alpha Hospital, Bury

I have applied my skills in undertaking a range of psychological assessments and interviews (with clients, family and carers) to inform a holistic understanding of a person's difficulties. More latterly, this has involved the promotion of psychological understandings of an adolescent's mental distress with families and staff teams, whilst also engaging young people in therapy to address their difficulties.

I am skilled in the use, interpretation and integration of neuropsychological testing, including with individuals with a brain injury and/or learning disability. Accordingly, I am proficient in developing written reports to meet the needs of the reader, including a wide range of professionals and making these reports more accessible for clients with cognitive impairments, and their carers.

Across settings, I have developed psychological formulations and interventions for individuals, families and staff teams, adjusting and refining these when appropriate. I am able to draw upon a range of therapeutic approaches (including CBT, DBT, CAT and Schema Therapy) to develop a personalised, multi-theoretical formulation, tailoring interventions around these and actively seeking ways to collaboratively develop these with the client. I have developed and facilitated a range of group therapies for clients with a range of mental health presentations, across different ages, with proven positive outcomes.

I forge avenues to work in a range of indirect ways to improve psychological aspects of health and healthcare, employing leadership skills. My understanding and respect for the impact of difference, diversity and culture upon the lives of service users has been enhanced through experience and a placement in Malawi, in which I delivered skills-based training and consultation for staff working in a Child Development Centre and in an acute mental health service.

Utilising my effective communication and training skills, I have successfully delivered workshops to teams around CBT, formulation, self-harm and working with young people and adults with complex mental health needs to improve the quality of service provision and promote psychological thinking. I also have experience of undertaking in-service research to promote advances in the role of psychological work in in-patient settings, resulting in publication. In addition, I undertake a supervisory role for other health professionals and offer mentorship to colleagues, promoting Clinical Psychology and personal wellbeing.

Professional Development

- 4 day Dialectical Behaviour Therapy Skills Training event
- 3 day conference on 'Childhood Sexual Abuse'.
- Conference on 'Family Therapy across Cultures'
- Training day on 'Attachment and PACE' training for work with young people.
